Subject: RE: RK Question - PART II

The copy of the most recent revised draft FS Report is the one that John Persico sent back in July 2018 (July 2018 draft FS). A few of the USFWS comments from February 2018 were incorporated in the July 2018 draft FS. The comments/changes that are in the copy that USFWS sent with their tracked changes were not incorporated in the July 2018 draft FS. We are planning on forwarding a few relevant comments from the USFWS tracked FS to the PRPs to incorporate in the next draft of the FS.

I can get you the responses that NJDEP sent to EPA regarding the draft FS if that would help?

The July 2018 draft FS does not reflect changes/edits from the more recent conversations that EPA and NJDEP have had, since as you noted the draft is from 2018. The next draft of the FS will have incorporated the changes to the FS that were referred to in EPA December 16, 2019 letter to Mark Pederson.

Thanks Jill! You can reach me at 212-637-4167 if you have any questions.

Subject: RE: RK Question - PART II

Thanks Supinder! Working from home I have no access to our data bases on which everything is tracked and no access to anything that I haven't uploaded to our one-drive. However, I was able to upload the most recent versions of the Report with attachments and appendices that you sent today. I had reached out to you because I had several versions of the July 2018 Draft Revised FS. I had a copy of the revised draft FS Report that John Persico (Geosyntec) had sent out back in July 2018 (which I think is the one you just forwarded to me), but also had another copy that I think USFW sent with all of its track changes. Do you know if the USFW comments were incorporated into this most recent version of the FS?

Now I just need to gather all of the responses we sent to you over the last year or so to enable this final review. Although, without access to my data bases, it makes it almost impossible to do this unless I come into the office.

Lastly, can you advise as to whether any of the changes to the FS to which EPA referred in its December 16, 2019 letter to SRP's Assistant Commissioner (Mark Pedersen) were incorporated into this most recent document as a result of ongoing discussions between EPA and NJDEP and if so, what those changes were? ? I know the Draft Revised FS predates the letter by nearly one and a half years which makes it unlikely. Thanks in advance! - Jill

Subject: [EXTERNAL] RE: RK Question - PART II

Hi Jill,

Apologies for the late response! Along with NJDEP comments/responses, we will also be sending EPA's comments to the PRPs, there will be changes to the draft FS. As stated in the letter from December 2019 the FS and the selected remedy will only address soil, groundwater will be addressed later, after implementation and monitoring of the soil remedy.

I have compiled a folder on OneDrive that has the most recent FS (which is redline strikeout), as well as the most recent appendices and figures. I will be sending you a link for it shortly. Please let me know if the link works for you.

If you have any further questions or need more documents, please let me know! Anything I can do to help =)

Thank you!

Subject: Fw: RK Question - PART II

Hi again. Can you send me an electronic version (pdf would be great) of the most recent version of the revised Draft FS Report? I have two different copies with different changes and I want to be certain that I'm using the most up to date version of the changes that were made over the last year or so. Both are dated July 2018, but are different. I'll keep working on the one I think is the most recent until you are able to forward the verified most up to date version of the Draft Revised report.

Any info regarding the email I sent to you yesterday (see below). Thanks in advance!!! - Jill

Subject: RK Question

Hi Supinder. I'm going through July 2018 revised Draft FS and all subsequent modifications to the Appendices, as well as all of the internal DEP emails and discussions regarding the RK site in order to bring everything from the last one and a half years forward. During this time frame, the DEP was also in receipt of a letter that was sent on December 16, 2019 by EPA to SRP's Assistant Commissioner (Mark Pedersen) regarding changes to the FS that EPA was incorporating into that document as a result of ongoing discussions between EPA and NJDEP. Although I'm in the middle of going through the in-house FS, I was wondering if the Dec 16, 2019 letter from Pat Evangelista would result in any changes to the July 2018 draft FS? - Jill
